

School Subscription Admin QA Report

Date: 2026-07-29 | **Branch:** feature/subscription-plans | **Surface:** Phases 1–7 (Plans, Catalog, License, Usage) | **Note:** after rebuild

API overall: **22 PASS** / **1 FAIL** (23 calls) — after rebuild

Service: **Rebuilt & restarted** on :8182 (-Xms128m -Xmx384m SerialGC); health UP

UI login: **PASS** (admin / demo-school)

UI host: http://localhost:4300 (4200 was Lab UI)

How to follow

1. Ensure `school-ui` is running (this QA used `ng serve --port 4300`; default script uses 4200 when free).
2. Open `/login` → Organization ID `demo-school`, Username `admin`, Password `password`, destination School Admin.
3. After sign-in, go to **Admin** → **Subscription** (`/admin/subscription`).
4. Walk tabs: **Plans** → **Catalog** → **License** → **Usage**.
5. Compare screenshots below (desktop 1440×900, tablet 768×1024, mobile 390×844).

Plans

API verdict: **PASS (6/6)** — list/get plans, projection, projection/modules, entitlements, and feature-flags all 200 after rebuild.

UI tested: Plans tab loads plan cards, entitlements chips; Edit/Assign actions present.

Gateway & cache

- Gateway login: **PASS** status 200, token present
- Gateway entitlements: **FAIL** status 401 (Unauthorized — gateway auth; direct :8182 with X-Internal-Service works)
- Entitlements cache double-GET: **PASS** (both 200 with Redis/cache off)

Responsive checklist

- Tabs wrap / stack as full-width buttons on $\leq 640\text{px}$ — **CSS added** in `subscription.component.scss`
- Grids (`.grid.two` / `.grid.three`) stack to 1 column at 640px — **CSS added**
- Tables: `.table-wrap overflow-X + min-width: 32rem` — **CSS added**
- Inputs/selects/textareas 16px on mobile (avoid iOS zoom) — **CSS added**
- Screenshots captured before/with SCSS change; rebuild/hot-reload school-ui to verify visually

Known gaps / recommendations

- **Done:** subscription-service rebuilt and restarted on :8182; Phase 2–7 APIs (projection, license, usage, validate, catalog PUT) now live.
- **Gateway 401** for unauthenticated `/api/subscription/tenants/current/entitlements` — send JWT from gateway login or fix internal-service header passthrough; direct :8182 works.
- Port **4200** may be Lab/shop UI; run school-ui on a free port (QA used **4300**).
- Eureka registration warns when discovery server is down (non-blocking for direct :8182).

API results summary

Name	Method	URL	Status	Result	Snippet
1_plans	GET	http://localhost:8182/api/subscription/plans	200	PASS	<pre>{"success":true,"data":[{"id":"government","code":"GOVERNMENT","name":"Government","planType":"GOVERNMENT","active":true}]}</pre>
