

School Management Application

Key highlights for client sharing — configurable, secure, and integrated school operations

1. One Unified Platform

Manage the complete student journey—from admission and enrollment to attendance, fees, examinations, promotion, and transfer certificates—in one system.

2. Key Capabilities

- Online admission with configurable approval workflows
- Automatic student enrollment and admission-number generation
- Student 360° profile (guardians, academics, attendance, fees, library)
- Global student and staff directories with search and export
- Class, section, subject, teacher assignment, and timetable
- Daily attendance with teacher roster and parent alerts
- Examination, gradebook, report cards, and PDF generation
- Fee structures, concessions, collections, and receipts
- Library catalog, issue/return, fines, and clearance
- Hostel bed inventory, allocation, and release
- Transport routes, vehicles, stops, and student assignments
- Payroll workflows and operational previews
- Parent and teacher self-service portals
- School announcements via Communication Hub
- Bulk student import with validation, dry-run, and commit
- Homework/LMS foundation with future external LMS options
- Promotion, academic lifecycle, and transfer certificates

3. Designed for Each Stakeholder

Management: dashboards, approvals, reports, audit trails, and multi-campus visibility
Administrators: admissions, records, fees, operations, imports, and configuration
Teachers: attendance, gradebook, report cards, and academic workflows
Parents: attendance, examination results, report cards, and notifications
Students: academic information and future homework/LMS services

4. Business Benefits

- Reduces repetitive administrative work
- Creates a single, reliable source of school data
- Improves fee and operational transparency
- Provides faster communication with parents
- Minimizes errors through validations and approval workflows
- Supports data-driven school management
- Improves accountability with complete audit history

5. Flexible and Configurable

- Feature-based subscription plans
- Configurable forms, workflows, rules, menus, and notifications
- Multi-school, multi-campus, and academic-session support
- Custom branding, localization, and module settings
- Role-based access with tenant and branch-level data isolation

6. Reliable and Secure

- Role-based permissions and restricted stakeholder access
- Tenant isolation between schools
- Audit logs and configuration rollback
- Health monitoring and operational-readiness checks
- Responsive interface for desktop, tablet, and mobile
- Offline synchronization support for selected activities

"A configurable, secure, and integrated School Management Platform that simplifies academic administration, improves parent engagement, and gives school management complete operational visibility."
